

Axios: AI Fellow role - Candidate Assignments

Assignment 1 -

(max 90 mins)

“Uber for Fly Fishing” - Conceptual Exercise

Below is a rough conceptual prototype for an “Uber for fishing and hunting guides” app. Please spend no more than 60 - 90 minutes on this exercise.

Link to app: <https://claude.ai/public/artifacts/c8a6a52e-8731-4ffa-93b4-74bacc7f15fd>

In 1 - 2 pages (*bullet points are fine*), answer:

- What are the 2 - 3 biggest product or user-experience improvements you would make to an initial version of this app, and why?
- What are the 2 - 3 biggest risks or hurdles you’d want to test early (e.g., market, operational, or technical)?
- Briefly: how might AI help validate or de-risk this idea (for example, through research, matching, or experimentation)?

We’re not looking for a perfect business plan, just to understand how you think, prioritize, and communicate.

Assignment 2 -

(max 30 mins)

“Your Current AI Project”

Describe an AI project you're working on right now:

- What is it, and how are you using the technology?
- How would you explain to Jim and Mike how you are using the technology & how they could use it?
